# Sheet steel access panel

## B2 System - Sheet steel access panel white with snap lock

### Product description:

The access panel consists of a sturdy outer frame and inner cover made of galvanised sheet steel or stainless steel. Concealed snap locks open the access panel when pressed. The standard colour is white RAL9010.

The profile of the outer frame is rounded. This creates a clean finish on plaster or plasterboard surfaces. The four riveted wall anchors ensure secure mounting in the wall or ceiling. The door leaf can be unhinged and is suitable for right and left hinges.

The access panel contains snap locks that are not visible from the front.

**Stainless Steel**

### Possible applications:

Sheet steel access panels can be used in plasterboard walls/ceilings as well as in solid walls/ceilings.

### Dimensions:

The sheet steel access panel with snap lock is available in the following standard sizes.

Dimension A is as follows:

- 200 x 200 mm
- 300 x 300 mm
- 400 x 400 mm
- 500 x 500 mm
