

Sheet steel access panel

B4 System - Sheet steel access panel white with profile cylinder lock

Prepared for on-site profile cylinders

Product description:

The access panel consists of a sturdy outer frame and inner cover made of galvanised sheet steel or stainless steel with integrated profile cylinder lock. The standard colour is white RAL9010.

The profile of the outer frame is rounded. This creates a clean finish on plaster or plasterboard surfaces. The four riveted wall anchors ensure secure mounting in the wall or ceiling. The door leaf can be unhinged and is suitable for right and left hinges.

The access panel can be locked with a profile cylinder lock (on-site profile cylinder).

Stainless Steel

Possible applications:

Sheet steel access panels can be used in plasterboard walls/ceilings as well as in solid walls/ceilings.

Dimensions:

The sheet steel access panel with profile cylinder lock is available in the following standard sizes.

Dimension A is as follows:
