

# Access panel for unhinging

F2 Alu-Magic System - Access panel with or without plasterboard inlay

Paint-ready door leaf

## Product description:

The access panel consists of aluminium profiles, without or with plasterboard inlay (GKBI) 12.5 mm, 15 mm or 25 mm and two snap locks.

The two frames of the access panel each consist of four individual frame parts that are firmly joined together by a special welding process. From size 300 x 300 mm, the access panel is equipped with a latch. To avoid possible accidents, this must be re-hung after each opening of the door leaf. The use of the access panel in the wall as well as in the ceiling area (not accessible) is possible without any problems. There is an air gap of 1.5 mm between the frame and the door leaf, which is provided with a circumferential seal. The concealed snap locks open the access panel when pressed.

## Special designs:

Special dimensions in any desired size can be manufactured on request.

## Special advantages of our system

- Inexpensive solution
- Short-term delivery possible
- Quick, trouble-free installation
- Sturdy aluminium frame
- Mature technology
- Flush installation in plasterboard ceilings and walls
